

## LOW PROFILE SCISSOR LIFT MODEL: STD-7230

- Electro-hydraulic lift with 4 cylinders
- Super low-profile design
- Hydraulic synchronization
- Manual emergency lowering
- Parachute valve included
- Overload valve included
- Lowering speed control valve included
- Two limit switches for maximum working height and the safety working height
- Electric system controlled by a CPU board
- Alarming during the final lowering

SPECIFICATION	STD-7230
Lifting capacity	3000kg
Max. lifting height	1900mm
Min. height	112mm
Platform length	1570 – 2000mm
Lifting time	60s
Electric power	220V/380V
Motor power	2.2KW/2.6KW
Weight	850kg
