

Features

Feature	Benefit	Advantage
Pro32™ software	User friendly software with pre-defined alignment programs known as Wizards.	Reduced operator set up time with the ability to customise and store alignment Wizards.
Comprehensive alignment readings	Complete 4 wheel geometry visibility, intelligent use of colours and multiple measurement pages.	Improved accuracy and faster problem identification.
Advanced adjustment information, with 3D animations and instructional text.	Easy to visualise images, and access to adjustment information.	Faster identification and increased confidence when making critical adjustments.
Comprehensive vehicle specifications.	OEM sourced vehicle specific information.	Accurate and detailed vehicle information providing faster geometry checks.
Active cradle adjustment	Suitable for vehicles with subframe assemblies that effect vehicle geometry.	Complete vehicle capabilities.
EzToe™	Front wheels can be turned out to provide easy access to toe adjustment points.	Improved productivity through faster, easier adjustment.
EzTrack™	User friendly personalised customer information.	Fast recall of specific customer vehicle, and alignment history.
EzShim™	Aftermarket shim information.	Accurate adjustment and part identification.
Symptom based diagnostics	Reduced pre-alignment testing time.	Enhanced productivity and greater "First Time Fix" confidence.
Advanced results based diagnostics	Improved customer satisfaction.	Improved productivity and fault identification from results based tips and recommendations.

SUNALIGN 2500 / 3500

Diagnostic Wheel Alignment Centres

- User friendly software procedures
- Highly accurate alignment results
- 3D animated graphics
- Comprehensive information & data storage
- Complete flexibility & versatility

flexibility, adaptability, profitability

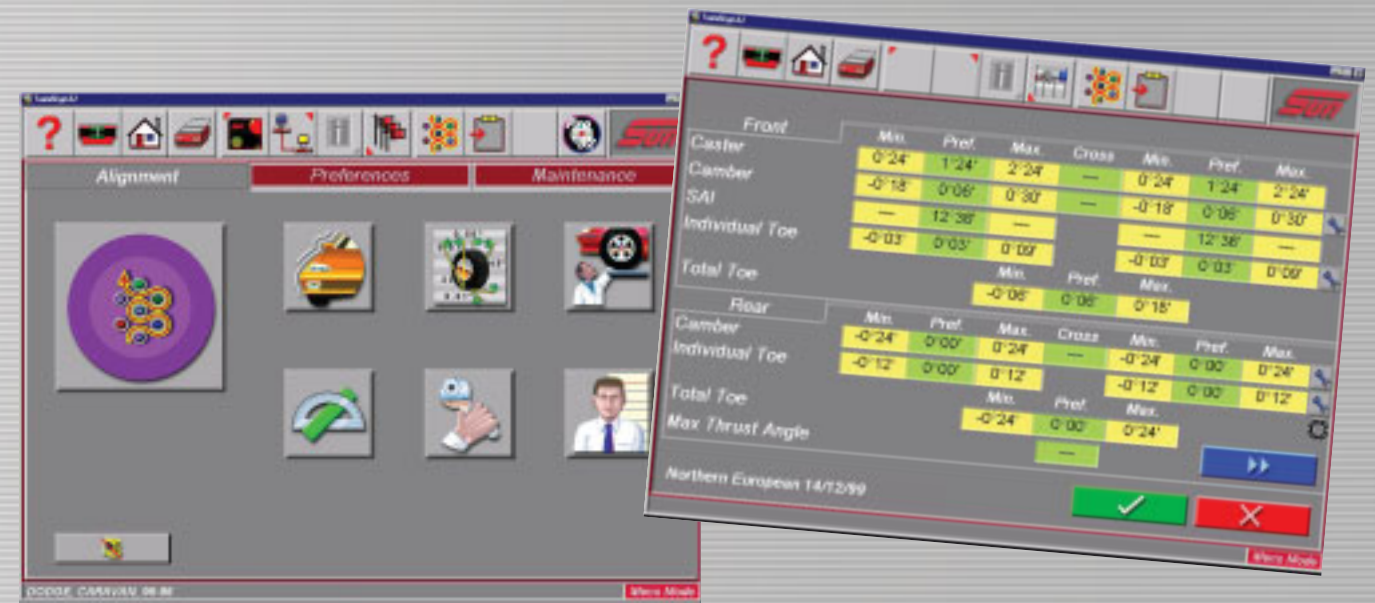

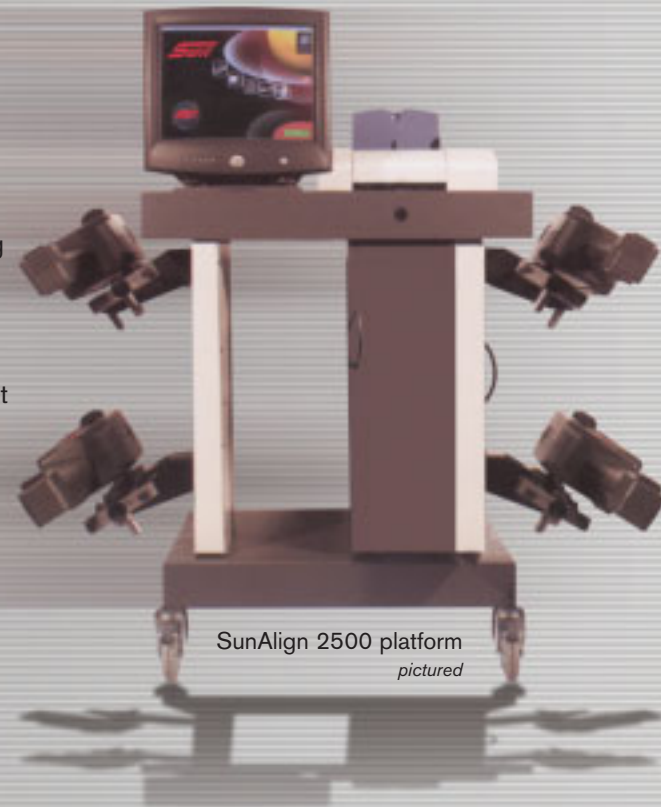

Introduction

The SunAlign range of computerised diagnostic wheel alignment equipment has been designed with the busy workshop in mind. The mobile diagnostic platform is durable and robust, with the measuring heads being constructed of high impact resistant materials.

The 8 CCD sensor measuring heads provide an increased measuring range of $\pm 25^\circ$ toe and $\pm 15^\circ$ camber, with a measurement resolution of 0.01° and electronic calibration, you can be assured of consistent high levels of accuracy when making adjustments.

A SVGA colour monitor provides the operator with high levels of visibility even at distance, and the colour ink jet printer provides a permanent record of customer vehicle information and data.

The SunAlign range uses the unique Pro32™ software that includes 3D animation and adjustment instructions to assist the operator throughout the test procedure.
